

911 On-Site Alerting

AVAYA IP Office and/or AVAYA AURA will notify crisis management and/or security the moment a 911 call is placed. This allows for assessment of the situation prior to arrival of first responders and may prevent escalation of certain emergencies.

Audible and visual notification is immediately sent to designated personnel through AVAYA phones, mobile phones, overhead speakers, two-way radios and a wide variety of other audible and visual devices.

Awareness –

When any AVAYA telephone dials 911 or other specified emergency numbers, an automated alert will be discreetly sent to key personnel and/or designated locations.

Notification–

Alerts can be sent to other AVAYA phones, LED displays, desktop notification, mobile devices and speakers.

Response Time –

Allows for assessment of the situation prior to arrival of first responders and **may prevent escalation of certain emergencies.**
