

TECHNOLOGY NIRVANA

What is it and how do you get there?

It is defined as technology enlightenment, freedom from technology suffering — a world where technology collaboration provides levels of customer service others can only dream of. STL Communications provides the path to TECHNOLOGY NIRVANA by integrating disparate business devices and technology so they collaborate to improve processes, create efficiency and provide the best customer service possible.

To achieve TECHNOLOGY NIRVANA,

STL Communications integrates five areas of technology:

Unified Communications: VoIP telephone systems, voice mail, email

Mobility: Cellular, wifi/wireless, mobility apps for smart phones, tablets

Networking: Network services, data switches, firewall, security

Conferencing: Visual collaboration, audio conference bridges

Contact Center: Inbound/outbound contact with customers via phone, email, chat, text

We surround this technology with STL Communications Support Services. Simply put, we install, service and maintain all the products we sell, providing you a single point of contact for all your technology needs.

Contact us for a demonstration of how we can help you reach TECHNOLOGY NIRVANA today!
